

# SWAMIL SUBODH

+91-9199214577 | [Gmail](#) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

## ACADEMIC BACKGROUND

---

**National Institute of Technology, Kurukshetra**  
*Bachelor of Technology in Artificial Intelligence and Machine Learning*  
**Delhi Public School, Bokaro**  
*Senior Secondary (Science) — Scored: 91%*

**Kurukshetra, India**  
*2023 – Present*  
*Bokaro, India*  
*2021 – 2023*

## TECHNICAL PROFICIENCIES

---

**Languages:** Python, Java, C/C++, Dart, JavaScript, HTML, CSS

**Frameworks / Libraries:** Flutter, React (Basic), Node.js (Basic), NumPy, Pandas, Matplotlib

**Concepts:** Machine Learning, Deep Learning, NLP, Computer Vision, DSA, Object-Oriented Programming, Neural Networks

**Developer Tools:** Git, VS Code, PyCharm, IntelliJ IDEA, Raspberry Pi, ESP32

**Interpersonal:** Analytical Thinking, Communication, Quick Learning, Problem Solving, Creativity

## KEY PROJECTS

---

**Ethereum Phishing Scam Detection Using Hybrid Graph Neural Networks (DA-HGNN) | PyTorch, Graph Neural Network, GRU, Conv1D, Blockchain, Python.**

- Built a hybrid deep learning architecture combining **Conv1D, GRU with Multi-Head Attention, and SAGEConv GNN**, using Graph Autoencoder (GAE) with 11-dimensional node feature vectors to learn both temporal and structural node embeddings.
  - Applied **sliding window-based data augmentation** to resolve class imbalance across 348K+ transaction records, balancing phishing vs. benign node samples for robust model training.
  - Achieved **99.4% AUC-ROC, 99.5% Recall, and 99.4% F1-score** on real-world Ethereum datasets, outperforming LSTM, GCN, GAT, and LightGBM baselines; validated through ablation studies and sensitivity analysis.

**The Donna Device | Raspberry Pi, ESP32, NLP, Python, Speech Recognition & Synthesis.**

- Designed and developed a smart voice-enabled assistant using **Raspberry Pi** with speech recognition and synthesis for hands-free, personality-driven interaction.
  - Implemented **NLP-based command processing** for contextual responses and integrated ESP32 for Wi-Fi connectivity to enable real-time information retrieval.

**ByteSized — Weekly Tech Digest Newsletter | HTML, CSS, JavaScript, Email Automation.**

- Designed and developed a **web-based weekly tech newsletter** delivering curated AI, startups, dev tools, and gadgets news — achieving 68% open rate and 5-minute read time.
  - Built a responsive subscription landing page with email collection and archive system, amassing **15 subscribers** with zero-spam policy and single-click unsubscribe.

## HIGHLIGHTS AND RECOGNITIONS

---

- Amazon ML Summer School 2025:** Selected through a highly competitive national selection process.
- 150+ LeetCode Problems:** Consistently solved algorithmic challenges strengthening DSA and problem-solving skills.
- 100,000+ Views:** Generated over 100K views through technology-focused content creation across platforms.
- Mime Competition — 2nd Position:** Secured 2nd place at Confluence'23, highlighting creativity and teamwork.

## CERTIFICATIONS & HONORS

---

- Special Mention — Valkyrie MUN (Indian Press):** Demonstrated strong research and journalistic aptitude.
- High Commendation — Muneoux MUN:** Represented Navjot Singh Sidhu, recognized for diplomatic acumen.
