

LOKESH MUDGAL

 +91-7976046003  luvkushmudgal@gmail.com  GitHub  LinkedIn — [LeetCode](#) — [Codeforces](#) — [CodeChef](#)

Summary

AI & Full Stack Developer with experience in MERN stack, Deep Learning, Computer Vision, and Blockchain development. Built scalable real-world projects involving YOLO, OCR, JWT authentication, Generative AI, and Solidity smart contracts. Strong problem-solving skills with 800+ DSA problems solved across coding platforms.

Technical Skills

Languages: C++, Python, JavaScript, SQL, Solidity

Frameworks: React.js, Redux, Node.js, Next.js, Express.js, FastAPI

Machine Learning: CNN, RNN, LSTM, YOLO, PaddleOCR, Generative AI

Tools: Git, MongoDB, Hardhat, Cloudinary, Google Colab, Jupyter

Core CS: DBMS, OOPs, Operating Systems, Computer Networks Distributed Systems

RAG & AI Frameworks: LangChain, FAISS, Vector Databases, Hugging Face Transformers, Pydantic, Groq API

Designing: System Designing , Design Principles , Singleton , Observer and Decorator Designing Patterns

Projects

3D Lung Tumor Detection using Deep Learning and Generative AI

Feb 2026 – Present

Python, CNN, Generative AI, Medical Imaging

- Designed a 3D medical imaging pipeline for automated lung tumor detection from CT scans.
- Implemented Generative AI-based augmentation to improve model generalization.
- Evaluated performance using Accuracy, Precision, Recall, and F1-score metrics.

HR Resume & LinkedIn Shortlisting Agent

May 2025 – Present

Python, FAISS, LangChain, Groq API

- Built an AI-powered ATS-style hiring assistant for semantic resume screening and candidate ranking.
- Implemented hybrid scoring using Sentence Transformers, FAISS vector search, and LLM-based reasoning.
- Developed automated PDF/HTML/JSON report generation with explainable candidate evaluation.

Collectibles

Aug 2025

React.js, Solidity, Hardhat, ethers.js

- Developed a blockchain-based NFT marketplace for secure buying and selling of digital collectibles.
- Implemented Solidity smart contracts for minting, ownership transfer, and transaction validation.
- Integrated escrow-style payment handling to improve transaction trust and security.
- Built a responsive React frontend with dynamic NFT rendering and wallet interaction.

Attendance Manager

Feb 2025 – Mar 2025

MERN Stack, JWT, Cloudinary

- Built a full-stack attendance management platform with secure JWT authentication.
- Integrated Cloudinary and Multer for image uploads and storage handling.
- Designed protected API routes with role-based authentication.

Achievements

- Solved 1000+ DSA problems across LeetCode, Codeforces, and CodeChef
- LeetCode Knight with maximum rating of 1878
- CodeChef 3-Star programmer with peak rating of 1631
- Codeforces Pupil with maximum rating of 1339

Education

National Institute of Technology, Kurukshetra

2023 – 2027

B.Tech in Artificial Intelligence and Machine Learning

CGPA: 8.9368(till 5th Semester)

Certifications

- Cisco Networking Academy – Cybersecurity
- HackerRank SQL Advanced Certificate
